

DIRECTIONS FOR USING THE TABLE CRUMBER

Lay the crumber on side with clip resting on table.

Let the crumber rest on clip, with inside of crumber facing the user.

Note: The scraping edge is now resting flat on table.

Grasp the crumber with the thumb on inside near the end where clip is located-hold the clip side with the index finger and middle fingers.

Proceed to scrape by tilting the crumber slightly forward away from the clip.

Let the tablecloth roll or wrinkle slightly as you scrape to de-crumbs the tablecloth, or use your other hand and hold the cloth tight and slightly raise cloths as you scrape.

Double scraping edge to accommodate right hand and left hand users.

METHOD OF DISPOSING OF CRUMBS

After the customer has finished the cocktail and eaten snacks, the server will use the crumber and dispose of the crumbs in the paper napkin used under the glass.

If the customer has an appetizer, the server will use the empty dishes to dispose of the crumbs.

After the customer has furnished the main course of the meal, the server will again clean the tablecloth and use the dishes being removed to dispose of the crumbs. This leaves the cloth clean for the serving of desert or after dinner drinks.

MAJOR ADVANTAGES

Keep tables neat and clean

Keep crumbs off the floor or rug

Customer appreciates the extra service

Adds distinction to the dining room

Conveniently carried in pocket - instantly ready for use.

In many cases, saves changing tablecloth after each customer
